Investment Information

Investment Objective & Strategy

The primary objective of the Northern Trust All Country World ex-US Index Fund is to approximate the risk and return characteristics of the MSCI All Country World ex-US (MSCI ACWI ex-US) Index.

This Index is commonly used to represent the large and medium cap segment of the non-U.S. equity developed and emerging markets. To achieve its objective, the Fund employs a replication technique which generally seeks to hold each index constituent in its proportional index weight. The Fund may make limited use of futures and/or options for the purpose of maintaining equity exposure. This Fund may not participate in securities lending.

Category Description: Foreign Large Blend

Foreign large-blend portfolios invest in a variety of big international stocks. Most of these portfolios divide their assets among a dozen or more developed markets, including Japan, Britain, France, and Germany. These portfolios primarily invest in stocks that have market caps in the top 70% of each economically integrated market (such as Europe or Asia ex-Japan). The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios typically will have less than 20% of assets invested in U.S. stocks.
